

Parents' Night Out Event Schedule

Zaniac's popular Parents' Night Out Events are filled with fun technology and engineering-based activities for your child. Led by our engaging instructors, Parents' Night Out events include exploration in STEAM activities such as Computer Programming, Robotics, 3D Printing, Engineering, Game-Based Learning: Minecraft™ and more!

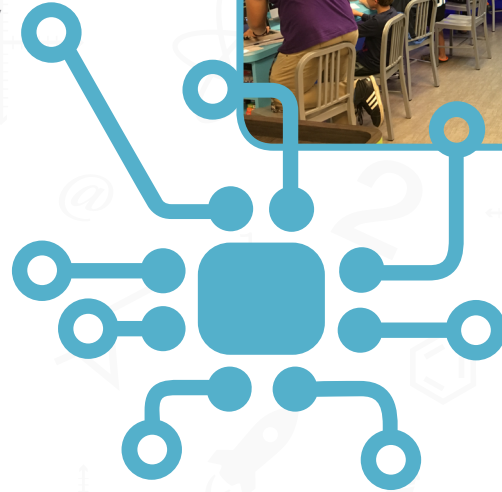

Details

- For kids grades K-8
- 6:30 p.m. to 10 p.m.
- A light snack and drink is provided
- Price: \$27 per child
- 10% sibling discount
- Edison Club Members: Use your member benefits
- Reservations required
- Space is limited, Hurry & sign up today

Private Events Available

If your neighborhood organization, mom or dad's group, church or business would like to have a private Parents' Night Out event at Zaniac, please call us.

Giving Kids the Confidence to be Curious

Parents' Night Out Events 2017 - 2018

Asheville, NC

Parents' Night Out Event Schedule 2017 - 2018

Superhero Design

September 9 & 23, 2017

We'll be designing Superheroes using our Art & Design program tools. Kids will create mood boards and themes for their heroes based on the superpowers they decide upon, and finish off the night with fully designed costumes for their caped (or not caped!) crusaders.

Spooky Science

October 7 & 21, 2017

We'll scare up a good time for the kiddos STEAM style. Build a haunted house with working lights. Channel your inner Dr. Frankenstein with circuits and LEGO monsters. Come dressed in your best costume to receive a prize!

Magnet Magic

November 4 & 18, 2017

Explore Magnetism by crafting a magnet train, making magnetic slime and defying gravity by floating paper clips.

Pajama Party Programming

December 2 & 16, 2017

Learn to code in your PJs. We'll be throwing a pajama party, complete with hot chocolate, popcorn and computer programming. Children can wear their favorite sleepwear and slippers! Our awesome instructors will lead your comfy kid through the basics of coding using Blockly or through more advanced techniques if they're ready.

Wizardry Wonders & Spell-Binding Science

January 13 & 27, 2018

Calling all Tech Wizards! Cast a spell with your own magic wand that you can take home. Design your wand on Tinkercad and print on our 3D printers. Create a magic spell in Scratch and watch your animation change with Code. Harness your computational thinking in circuitry by using sensors in Tinkering to create your own spells. Revelio Zaniaco.

Rube Goldberg Machines

February 10 & 24, 2018

Usually we use engineering to create simple solutions to complex problems, but this time we're turning that paradigm on its head! Join us in taking the domino effect to entirely new heights. We'll be using our STEAM skills to build the mother of all Rube Goldberg Machines. See what your child creates at the end of the night!

Musical Makers

March 10 & 24, 2018

Let your inner musician play and produce at Zaniac! Build a custom synthesizer with littleBits®, sequence sounds with GarageBand, and mix beats with code to produce a soundtrack for a Scratch animation. Let the music play!

Eggsellent Engineering

April 14 & 28, 2018

We are going to conduct some egg drops in the name of science. Bring your kids in ready to engineer their way to eggsellence! They'll learn the basics of design by creating containers for their eggs and dropping them to their destiny.

Battle Bots

May 12 & 26, 2018

We will be making a robot out of LEGO parts, and then will break into teams so we can battle the robots against each other. Each robot will be piloted by remote control, and the objective will be to push the opposing robot outside of the ring. Come learn about robotics and physics as we smash, flip, and shove the competition aside.

Let it Snow

June 9 & 23, 2018

Let's have winter wonderland in the summer! It may not be snowing outside, but at Zaniac we'll make it snow. We'll learn the science of ice and snow with frozen playivities. Create wonderful light decorations and watch them sparkle.

Myth Busting Night

July 7 & 21, 2018

Observe, measure, experiment and test with us. Zaniac's instructors use the scientific method to bust popular myths through fun, hands-on experiments.

Up, Up & Away

August 4 & 18, 2018

Ready, set, take off! Why do planes fly? We take a look at aerodynamics and propulsion and make our own planes in the Kerbal Space Program. Our engineering skills will take flight using Drone technology. And we understand Newton's Law with Balloon Rockets.
