

# Intro to GarageBand®

Dive into the world (and science) of music production!

Intro to GarageBand® is the perfect primer for beginners who want to learn the basics of one of the most popular and accessible DAW (Digital Audio Workstation) programs out there.

Starting with the basics of musical notation and form, students work through looping, editing, sound manipulation, and capturing vocals and MIDI instrumentation to create their own music.

Get hands-on experience with real-world music production equipment and bring your song ideas to life!

## Intro to GarageBand®:

- Classes meet 90 minutes once a week for six weeks
- Low ratio of 5 students or less per instructor
- Hands-on experience with real-world music production equipment, including MIDI controllers and microphones
- Showcase musical skill in an easy-to-use and fun Digital Audio Workstation program
- Share the finished songs with family and friends
- Personal progress emails from your instructor after every class
- Peer-based instruction and a fun atmosphere—learn and build with friends
- For grades 3-8
- Tuition: \$299
